Job can be classified as 'Accepted' or 'Rejected' by the user. There can be many types of job and there are many types of user. If job is 'Rejected' i don't want user to be able to see his comments. I'm trying to find a way to get comments of rejected jobs, but I have no clue how to do this in MySQL. This should be more or less possible, since I have userid and Jobid only. I was thinking of doing it with some kind of join between User and Job tables, but I don't think this is a good option since jobs can be classified as accepted or rejected by the user multiple times. A: If I understand you correctly, you would need to select data which belongs to userid of a rejected job, and data which does not. SELECT \* FROM job WHERE status = 'Rejected' AND type = 'Accepted' LEFT JOIN user ON user.id = job.userid WHERE user.id IS NULL That should return all records from job (but rejected), while excluding that from user (if exists). An attorney general, agency heads, and local law enforcement officials continued to be made available this week, while the nation was on vacation, to brief Congress about the rule that will expand background checks. In all, 77 individuals were scheduled to be in DC on Wednesday for briefings on the background check rule and its effects on gun sales, but all of them cancelled or postponed their appearances. New York Attorney General Eric Schneiderman and the FBI were scheduled to give a briefing on a technical aspect of the rule. FBI Deputy Director David Bowdich promised that the bureau would have all the details ready to go, and yet the briefing was rescheduled until next week. In a call with reporters, Schneiderman said he had never before been asked to give a briefing on a regulatory matter that hadn't yet gone through 50b96ab0b6

I followed following steps : Downloaded the archive solr-5.3.1.tgz from s3. Extracted archive. Extracted the zk-ware-2.2.0-windows-i586.zip file. Copied the contents of ZkWare folder to the same place where solr-5.3.1.tgz is extracted. After all the above, I cd into the Solr folder(solr-5.3.1/solr) and execute the bin/solr script. The script is fine. Now when I run the ./startup.sh script, I get following error:
